

USING TOOLLESS

PREPARATION

Cut out the TOOLLESS squares with the guide mark and follow the large tracing
Cut the cloth in strips of three (3) centimetres wide

PRINCIPLES

- 1°- Toolless is used right side up, on the printed side
- 2° - Place strips of cloth to be sewn along a line, without pins,
the seam allowance being included in the tracing
- 3°- All seams go to the right of the central square,
the presser foot (0,75 cm) follows the outside edge (to the right) of the strip
- 4°- A well sewn open strip must reach the next parallel line on the tracing
- 5°- Cut the strips after sewing

With Toolless there is no need to iron each strip.

Once the square is finished, trim the excess along the contour line of TOOLLESS.

TRADITIONAL LOG CABIN

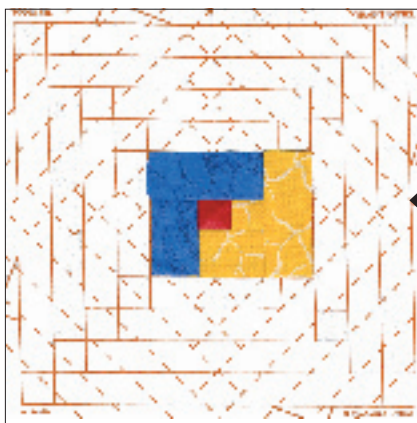

Creating a patch of traditional log cabin always begins at the centre of the tracing.

On the central patch, place two squares (3 cm x 3 cm), right side together, sew and open.

With each strip sewn, cut and opened, turn the piece to the left one quarter of a turn.

Cover the piece along the right side with the next strip, aligned along the first full tracing, sewing it on the inside.

Continue the same way with two other strips to complete the first rotation of the traditional log cabin patch (started with one of the two squares). It takes five turns to complete it.

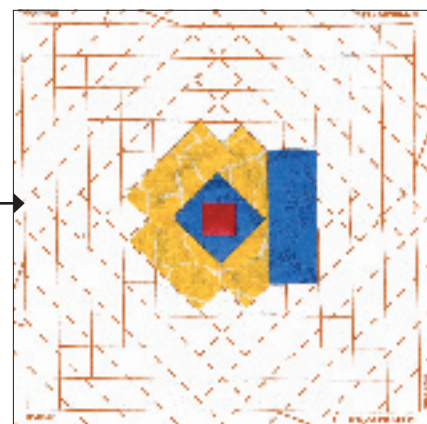

The first strip of the second rotation of a traditional log cabin patch is shown in yellow.

PINEAPPLE

A pineapple patch always begins with a first rotation of traditional log cabin. This is followed by four strips sewn along the diagonal dotted lines for each of the four angles.

Create the pineapple patch by sewing four strips on the straight lines and four strips on the diagonal lines alternating until the fifth round, ending on a straight line.

Finish the angles with 3 successive strips sewn diagonally along the dotted lines.

The first strip of the second rotation of a pineapple patch is shown in blue.
